## INTRODUCTION

The number of dwellings (occupied, vacant, and under construction), the number of households classified according to size, and the average size of household, as recorded in the 1956 Census, are presented in this report. Comparative figures from the 1951 Census are shown for population and households in Table 32.

For census purposes, a dwelling is defined as a structurally separate set of living premises with private entrance from outside the building, or from a common hall or stairway inside. The entrance must not be through anyone else's living quarters.

An occupied dwelling is defined as one which, on June 1, 1956, was the usual place of residence for one or more persons.

A vacant dwelling is one that was suitable for occupancy but unoccupied at the time of the census.

A dwelling is considered to be under construction from the time the foundation is begun until it is suitable for occupancy or until the first household moves in.

A person or group of persons occupying one dwelling is defined as a household. Every person is a member of some household and the number of households equals the number of occupied dwellings. A household usually consists of a family group with or without servants, lodgers, etc. However, it may consist of a group of unrelated persons sharing a dwelling or of one person living alone.

There are two main types of household: (1) the household which consists of one person or a small group of persons living in an ordinary dwelling, sometimes called a private household; and (2) the collective type of household, which includes hotels, large lodging houses, clubs, boarding schools, institutions of all types, military camps, lumber camps, and other establishments of a similar nature. However, in such types of collective households as institutions and military camps, there may be private households in structurally separate quarters within the grounds of the institution or camp. In the tables of this report, households of the collective type are excluded. The number of such households is less than one per cent of the total number of households, and persons living in households of the collective type represent approximately three per cent of the population.

## INTRODUCTION

Le présent rapport donne le nombre de logements (occupés, vacants, ou en construction), la répartition des ménages selon leur taille, et la taille moyenne des ménages, d'après les données du recensement de 1956. Le tableau 32 donne les chiffres correspondants du recensement de 1951 concernant la population et les ménages.

Aux fins de recensement, on entend par logement une série de pièces d'habitation distincte au point de vue de la structure et qui a son entrée particulière de l'extérieur de la maison ou sur un corridor ou un escalier commun à l'intérieur. L'entrée ne doit pas passer par les pièces d'habitation d'une ou d'autres personnes.

On entend par logement occupé, un logement qui, le 1<sup>er</sup> juin 1956, servait de domicile ordinaire à une personne ou plus.

Un logement vacant est celui qui, bien que habitable, n'était pas habité au moment du recensement.

Un logement est en construction à compter du moment où les fondations sont commencées jusqu'à celui où il est habitable ou que ses premiers habitants y font leur entrée.

Une personne ou un groupe de personnes occupant un logement constituent un ménage. Toute personne fait partie d'un ménage et le nombre de ménages est égal à celui des logements occupés. Un ménage se compose souvent d'un groupe familial avec ou sans domestiques, chambreurs, etc. Parfois, cependant, il se compose d'un groupe de personnes non apparentées qui partagent un logement, ou se réduit à une personne vivant seule.

Il y a deux genres principaux de ménages: 1<sup>o</sup> le ménage constitué d'une personne ou d'un petit groupe de personnes demeurant dans un logement ordinaire, et appelé parfois ménage privé; et 2<sup>o</sup> le ménage genre collectif qui comprend les hôtels, les grandes maisons de chambres, les clubs, les pensionnats, les institutions de tous genres, les camps militaires, les chantiers d'abatage du bois, et les autres établissements de nature semblable. Toutefois, sur le terrain de certains genres de ménages collectifs, par exemple les institutions et les camps militaires, il peut y avoir des ménages privés dans des locaux d'habitation distincte au point de vue de la structure. Les tableaux du présent rapport ne comprennent pas les ménages dits collectifs, qui constituent moins de 1 p. 100 du nombre total des ménages et dont les personnes qui les composent ne représentent qu'environ 3 p. 100 de la population.

## REPORTS OF THE 1956 CENSUS OF CANADA
